-5-

LC 0134 PUS

REMARKS

In the Action, the Examiner commented on the description of Figures 7 and 8. The descriptions were obviously reversed and an appropriate correction to the specification has been made herein. In addition, the spelling of polypropylene has been corrected in claim 19.

On the merits, claims 16, 17, 19, and 20 were rejected under 35 U.S.C. §103(a) as being unpatentable over the Miller patent in view of the Han patent. Also, claims 18 and 21 were rejected under the same statutory section in view of the same two references when viewed further, respectively, in view of the Weinerman patent or the Youngs patent. Finally, claim 23 was allowed and claim 22 was indicated as having allowable subject matter.

By this amendment, the Applicant has amended claim 16 to include the subject matter of allowable claim 22, with claim 22 being cancelled. The allowance of claim 23 is noted.

In view of the foregoing, all of the claims remaining in the case, namely claims 16-21 and 23 are in proper form and patentably distinguish from the prior art. Accordingly, allowance of the claims and passage of the application to issuance are respectfully solicited.

Respectfully submitted,

ARTZ & ARTZ
